Brake drum with hub

We are expanding our spare part product range for classic Volvo cars. Brake drums with hub are now available.

The BASTUCK Classic brake drums with wheel hub and wheel stud are now available for all brake systems with 1 or 2 circuits in the Volvo Buckel, PV 445, 544, P210, Amazon and P1800 (rear axle). The steel wheel hubs are made of high quality 42CrMo4 steel and are very durable. That is why they are also suited for classic Volvo motorsport. Furthermore, it can be used immediately without reworking, which simplifies assembly.

A more inexpensive alternative is to order the brake drum alone which is then used with the original wheel hub. Changing the brake drum is not an easy procedure though and needs a special tool as well as a press.

» **brake drum with and without steel wheel hub and wheel stud**

» **also suited for motorsport use**

» **steel wheel hub made of high quality 42CrMo4 steel**
