

VOLVO P1800 S/ E/ ES

OUTER DOOR PANEL LEFT- AND RIGHT-HAND-SIDE

Anyone who restores their Volvo P1800 is familiar with the unconvincing and not always available reproduction panels that are still available on the aftermarket today.

For us, this is reason enough to produce new and high-quality tools for the outer door panel of the Volvo P1800. They make it possible that the BASTUCK sheets are qualitatively similar to the original Volvo sheets. In addition, the BASTUCK sheets are provided with all the necessary cut-outs and holes. In order to give rust no chance, we have manufactured them from galvanised deep-drawn sheet metal and additionally primed them to a high standard.

- » **made of galvanised deep-drawn sheet metal**
- » **high-quality primed**
- » **perfect fit**
