TRIUMPH GT6 MK2-3 AND VITESSE MK2 (VEHICLES WITH ROTOFLEX REAR AXLE)

Fixation screw for thrust strut HA41GT6

Who owns a Triumph GT6 or a Vitesse MK6 (year 1969 – 1972) knows the problem of no longer available original spare parts for the complex „Rotoflex“ rear axles. In order to further improve the parts supply, we have re-manufactured the retaining bolts for the thrust strut as an exact replica from high-quality steel.

The completely galvanized retaining screw including the bracket with the fixing strap of the brake hose is available for the right and left rear axle and is similar in every detail to the original part which is no longer available.

- » exact replica of the no longer available original parts
- » made of high-quality steel
- » completely galvanized

Article No.	Description	Price EUR
HA41GT6L (Ref. No. *: 148976)	Fixation screw for thrust strut (left)	67,37
HA41GT6R (Ref. No. *: 148975)	Fixation screw for thrust strut (right)	67,37
