

BASTUCK CLASSIC PRODUCT INFORMATION

EDITION 22/22 | 01.06.2022

VOLVO PV444, PV544

REAR MUDGUARD LEFT AND RIGHT HAND SIDE

For a long time, the rear mudguards for the Volvo Buckel (PV444, PV544) were not available. Anyone who is currently restoring their classic or planning a restoration can now use the new BASTUCK mudguards.

They are of better quality than the original ones, which is possible due to the use of new and high-quality tools that we have had specially manufactured. As lovers of classic cars, we know how important it is that the spare parts fit perfectly, so we have paid special attention to this issue.

In addition, we like to make things easy for our customers: that's why the BASTUCK sheets are already provided with all the necessary cut-outs and drill-holes. To give rust no chance, we have made them from galvanised deep-drawn sheet metal and also given them a high-quality primer coat.

The rear right mudguard is available immediately, the rear left mudguard will be available shortly.

- » made from galvanised deep-drawn sheet metal
- » high-quality primer
- » perfect fit
