

Volvo Amazon, PV444, PV544, P210: Sun visor

- high-value BASTUCK Classic quality
- perfect fit
- true to original reproduction

Midsummer has arrived and we are expanding our product range with high-quality sun visors. Those who had to buy replacement sun visors so far have often been shocked or even angry about their price and poor fit. As we considered them to be quite expensive, we have now had the sun visors for the Volvo Amazon, the PV444 and the PV544 reproduced in black and grey.

They not only correspond to the original in terms of form and design, but they also convince by their quality and their perfect fit. Just like the original Volvo sun visors, our product also has welded seams all along the sun visor. This is a detail which clearly distinguishes the BASTUCK sun visors from other aftermarket sun visors available on the market.
