

Triumph Spitfire 1500: switch at steering column for vehicles from model year 1977

- perfect fit
- true to original reproduction
- high-value BASTUCK quality

From now on two further newly manufactured switches for the Triumph Spitfire 1500 make part of our classic parts product range. The switch for the windscreen wiper has not been available anymore, so we decided to have this one reproduced with lots of attention to detail and in a true to original quality.

We also had a second switch reproduced. The combination switch for turn signal, horn and high beam which has been available on the market did not fit accurately, so we decided to reproduce it in high-value BASTUCK quality.

The insufficient distance between switch arm and steering wheel of the reproductions (also in Lucas packaging) on the market frequently caused annoyance. The short distance led to an unintentional actuation of the switch. For our BASTUCK turn signal/horn/high beam switch the distance has been adjusted and corresponds to the switch which has originally been installed on the vehicle.

Art.-No.	Name	Price EUR
